

KIENZLER WASHING SERVICE

Our maintenance and care service

Textile air ducts require an individual and professional cleaning cycle

Kienzler Textile Ventilation GmbH has more than **30 years of experience** in ventilation and air conditioning technology. We have specialised in textile air conditioning components since 1993. We offer comprehensive solutions for all applications in the comfort air conditioning sector - from consulting, planning and production to service and maintenance.

General cleaning criteria

- Hygiene regulations of the company or the respective type of application
- Visual degree of soiling
- Pressure increase in the textile air duct of >30 Pa due to the operating conditions (defective pre-filtration, environmental influences, particle separation)

Our services

- On-site collection on request
- Professional preparation and execution of the washing cycle depending on the make (all TLS manufacturers)
- Quick and thorough cleaning
- Free inspection for damage (holes, tears, etc.)
- Free repair of minor damage (e.g. missing clips)
- Complex repairs by arrangement
- Return of the textile ducts

Cost overview*

	Diameter < 900 mm		Diameter > 900 mm	
	slightly dirty	heavily dirty	slightly dirty	heavily dirty
